

## About Feel Good Contacts

Feel Good Contacts was founded in 2008 by caring and qualified optometrists, with the aim to provide contact lenses and eye care products for most affordable prices. Their history dates back to 1998, when they began their journey as a wholesaler of contact lenses, supplying opticians worldwide.

Today, Feel Good Contacts can save customers up to 50% on their contact lenses, eye care products and sunglasses compared to high street opticians and retailers, whilst offering a tracked, next day UK delivery as standard, FREE Click & Collect and speedy international delivery for over 30+ other countries.

Moreover, Feel Good Contacts is a proud partner of [TerraCycle](#) who is working with Acuvue (manufactured by Johnson and Johnson) to recycle contact lenses and contact lens packaging. The contact lens recycling programme urges customers to reduce plastic waste to help contribute to a greener environment.

Customers can simply collect your contact lenses in a small box or container and drop them off at our North London warehouse. Click and Collect customers can bring their old lenses when you come to get your new lenses.

With over 250 people losing their sight every day, Feel Good Contacts aims to work with charities to help raise awareness among health professionals and the public to prevent vision impairment.

One of Feel Good's biggest fundraisers has been for the Childhood Eye Cancer Trust (CHECT) where the Feel Good staff members took part in a mini marathon organised by Run Through UK. The initial fundraising target was £500, but due to the kindness of those who sponsored the marathon run, £1,645 was raised!

Feel Good Contacts have a 9.7/10 customer rating in TrustPilot is one of the highest in our industry. They believe that contact lens wearers should be able to choose who they buy their products from, pay a fair and affordable price and receive their products quickly.
